1. Applicant's election with traverse of Group II (claims 15-30) in Paper No. 4 is acknowledged. The traversal is on the ground(s) that the search for the product would encompass a search for the method, and, as such, there would be no serious burden to search the claims of Group I in addition to elected Group II. This is not found persuasive because searching Group I would require a different search strategy and add a serious burden to a search for the instant application.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-30 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of Vadlamani et al, Walon, Kampen, DE4428933, and Meuser et al (New Approaches to Research on Cereal Carbohydrates).

Any one of said references discloses a aqueous slurried product containing separated (i.e. not agglomerated) starch granules and protein.
